

DWA_04.3 Knowledge Check_DWA4

1. Select three rules from the Airbnb Style Guide that you find **useful** and explain why.

Strict searches :

`!==, ===`

Simplify naming conventions:

`// bad`

```
function foo(name, options, arguments) {  
  // ...  
}
```

`// good`

```
function foo(name, options, args) {  
  // ...  
}
```

Simple and easy to follow variable selectors:

```
const foo = 1;  
let bar = foo;
```

```
bar = 9;
```

```
console.log(foo, bar); // => 1, 9
```

2. Select three rules from the Airbnb Style Guide that you find **confusing** and explain why.

Vars must be consts or lets:

```
// const and let only exist in the blocks they are defined in.
{
  let a = 1;
  const b = 1;
  var c = 1;
}
console.log(a); // ReferenceError
console.log(b); // ReferenceError
console.log(c); // Prints 1
```

Makes it harder to read for me:

```
const foo = document.querySelectorAll('.foo');
// good
const nodes = Array.from(foo);
// best
const nodes = [...foo];
```

YES but NO basically:

```
// good
if (test) return false;

// good
if (test) {
  return false;
}

// bad
function foo() { return false; }

// good
function bar() {
  return false;
}
```
